

Acharya — Ara Field Kit

Exam-authentic test papers, in your institute's name

Priyanshu

Marketing Partner & Regional Head

Ara & Bhojpur, Bihar

TrigunAI Innovations · Issued 18 August 2026 · Confidential
The live version of this kit lives in your Claude — say “start my day”.

oo • START HERE — Priyanshu

Welcome. You are **Marketing Partner and Regional Head for Ara / Bhojpur** at TrigunAI Innovations.

This folder is everything you need. It was written for you, from the kit that is already working in Patna, re-cut for the fact that **Ara is a govt-exam town, not a JEE/NEET town** — which turns out to be an advantage for us.

What you are selling, in one sentence

"Aapke institute ke naam se, unlimited exam-authentic test papers — TRE, SSC, Railway, Banking, board — 30 second mein. Asli past-paper questions, asli answer key. Aapko paper banane ki zaroorat hi nahi."

Learn that line before anything else.

What you are actually being measured on

Batches live, with students who actually took a test this week.

Not visits. Not interested owners. Not "unhe bahut pasand aaya." One institute genuinely using Acharya every week is worth more to this company than fifty good conversations, and the whole kit is built to get you there.

Read in this order (≈90 minutes, once)

1. **01_PRODUCT_MASTER.md** — what Acharya is, and what it is not. **Read twice.**
2. **02_ARA_MARKET_BRIEF.md** — your region, and why TRE is our best card in Ara
3. **05_PRICING_AND_OFFER.md** — the numbers. Never quote anything not on that page.
4. **04_DEMO_PLAYBOOK.md** — the 3-minute demo. Practise it out loud, twice.
5. **07_FIELD_RESEARCH_GUIDE.md** — the discovery questions
6. **06_OBJECTIONS.md** — the nine things you will hear
7. **03_ARA_SOURCING_GUIDE.md** — how to build the Ara list
8. **09_FIRST_15_DAYS.md** — your ramp, day by day
9. **10_RULES_AND_ESCALATION.md** — the lines, and when to call Deepak
10. **11_YOUR_TERMS.md** — your compensation, and what you may pay a hire
11. **08_TEAM_BUILD_PLAYBOOK.md** — **only after your own first pilot is live**

Background, read when you have time: **COMPANY_CONTEXT.md**, **BRAND_POSITIONING.md**, **ACHARYA_FEATURES.md**, **ACHARYA_PAINPOINT_MATCH.md**.

Then, before you visit anyone

Generate five test papers yourself at `acharya.trigunai.com/exam-prep` , on five different exams and chapters. **Print one.** Try to break something and tell Deepak what broke.

You will sell this far better having used it than having been told about it.

How to use your Claude

Everything in this folder is loaded into your Claude. You don't have to remember it — ask.

Say this	You get
"start my day"	Today's plan and who to work
"who do I visit in today?"	A walking route from your list
"prep me for "	Everything known about them + the questions to ask
"log my visit to : "	The row written, same day
"price kya bataun?"	The current, correct numbers
"objection aaya: "	The answer, in Hindi, ready to use
"show my week"	Your own count

The one thing to keep in mind

This company has built a lot of product and sold very little of it. **You are not support for the product — you are the part that has been missing.** The engineering is done; what has never been properly tested is whether institutes will install it and pay for it.

Ara is yours to answer that in. Report the truth, including the nos — especially the nos.

Deepak Kumar · Co-Founder, CEO & CTO · TrigunAI Innovations

Kit issued 2026-08-18.

01 · Product Master — what Acharya actually is

Read this twice before your first visit. You cannot sell a product you can only describe from a brochure. By the end of this page you should be able to answer, without looking anything up: *what does it do, what does it not do, and why would an Ara institute owner care?*

1. The product in one line

Acharya is an exam-authentic test-paper engine. An institute owner opens it, picks an exam, picks a subject, picks a chapter — and gets a complete test paper in about 30 seconds, printed under **their own institute's name and logo**. Unlimited papers. No paper-setting work.

There is more in the product (a WhatsApp tutor, a student practice app, a weak-topic dashboard). But **test papers are the wedge**. That is what we lead with, because that is the pain owners feel every single week.

2. Why an owner cares — the actual arithmetic

Ask any owner how long one good test paper takes. The honest answer is **2–4 hours**: finding questions, checking the answer key, typing it, formatting it, printing it. Now multiply:

- $3 \text{ batches} \times 1 \text{ test a week} \times 3 \text{ hours} = \mathbf{9 \text{ hours a week gone}}$, every week
- The hours come out of the owner's own evenings, or out of a teacher he pays for teaching
- And when the week is busy, **the test gets skipped** — which is the thing that actually costs him students, because parents notice when tests stop

Our pitch is not "AI is exciting." It is: **those 9 hours come back, and the test never gets skipped again.**

3. What is genuinely live right now (2026-08-18)

Be precise about this. Never inflate it — you will be caught in the room, and it is the fastest way to lose an owner permanently.

The question bank — real past-paper questions

These are **real questions from real past papers with real answer keys**. Not AI-written, not paraphrased. That is the single most credible thing we have, and it is what you say out loud:

"Ye AI ka banaya hua nahi hai. Ye ASLI past-paper ke asli questions hain — asli answer key ke saath."

Exam	What's live
BPSC TRE (teacher recruitment)	2,026 real questions , chaptered — History 303 · Geography 276 · Polity 242 · Economics 233 · combined GS 972
SSC CGL	live in the picker
Railway — NTPC / Group D / ALP	live in the picker
Banking	live (quantitative questions are computed, so the answer is always correct)
UPSC Prelims	517 real past questions
CBSE / board — Class 10, Class 12 (PCM + Commerce)	real board questions
JEE / NEET	live and tested (less relevant in Ara — see the market brief)

Total bank across all exams: ~**145,000 verified questions**.

The features that are live

- **Unlimited paper generation** — any exam, any subject, any chapter, in ~30 seconds
- **White-label, free and self-serve** — the institute's own logo, colour and watermark on every printed paper, set from their own dashboard at </teacher/branding>. **This is free.** (See §5 — the old ₹55,000 charge is dead.)
- **Share a test by link** — students take it with **no signup**, on their own phones
- **Weak-topic dashboard** — after a test, the owner sees which chapter the whole batch is weak in
- **Printable papers** — for institutes that run tests on paper, which in Ara is most of them
- **A WhatsApp AI tutor** — students ask doubts, get taught in Hindi, in the institute's name
- **A student practice app** — self-study, mastery tracking

Where it lives

- Institute / teacher side: acharya.trigunai.com/teacher
- Student side: acharya.trigunai.com/exam-prep

4. What Acharya is NOT — say these out loud in the room

Honesty here builds more trust than any feature. Owners in Bihar have been sold to before, badly.

- **✗ It does not replace their teaching.** It is a test-paper and practice engine. Say that plainly.
- **✗ It does not guarantee marks or results.** Never promise a result. Say "*zyada practice, aur progress dikhta hai*" — never "*rank aayegi.*"
- **✗ It is not used by thousands of institutes.** We are newly launched and looking for our first serious partners. Say exactly that. It is true, and owners respect it more than a fake crowd.
- **✗ Combined General Studies still has ~78 questions in a mixed bucket** — generic "*which statement is correct?*" stems with no clean topic. If the picker surfaces one, say so. Don't hide a flaw the

owner can see with his own eyes.

- **✗ It is not a full ERP.** No fee collection, no attendance, no biometric. If they want that, they want Classplus — and that is fine, we sit alongside it.

The test for anything you're about to say: could the owner check it on his own phone in 60 seconds and find you wrong? Then don't say it.

5. Pricing — the short version (full detail in 05_PRICING_AND_OFFER.md)

- **₹150/month junior · ₹250/month senior. Flat.** Same for a student, a teacher, an institute.
- **Free to start. Pay after month 1.**
- **White-label is free.**

⚠ The ₹55,000 one-time white-label charge is DEAD. Never quote it. It was replaced by the free self-serve feature. If you hear anyone quote it, correct them.

6. Who we are

TrigunAI Innovations — a small AI product company. Deepak Kumar is Co-Founder, CEO & CTO and builds the product; Avinash is Co-Founder & Chief Research Officer. We are early. We are not a 100-person company and you should never imply we are.

What that means for you in the room: our advantage is not scale, it is that *the person who builds the product answers the phone*. An owner who reports a problem on Monday can genuinely have it fixed by Tuesday. Rohan reported a broken chapter picker on 17 August; it was fixed the same night, along with four more bugs found underneath it. **That is a real selling point — use it.**

7. The one paragraph that matters most

We have built a great deal of product and sold very little of it. The company's actual bottleneck is not features — it is **institutes that have installed it and use it every week**. That is why your job exists, and it is why the standard is *installed and in use*, not *they liked it*.

So when you report to Deepak, report the hard number: **how many batches are live, and did students take a test this week**. Everything else is conversation.

02 · The Ara / Bhojpur market — your region

You know this ground better than this document does. Everything below marked ⚠ is Deepak's read from outside, and you should correct it from what you actually see. **Corrections go in `ara_institutes.csv` and in a message to Deepak** — a wrong assumption that survives three months is expensive.

1. Why Ara is a different market from Patna — and why that is good news

Rohan works Patna. Patna is a **JEE/NEET city**: premium institutes, digital-savvy owners, national chains on every corner, and a lot of competition for the owner's attention.

Ara is a govt-exam town. ⚠ Read: the money and the emotion in Bhojpur sit in

- **BPSC TRE** (teacher recruitment) — huge, and it is *the* aspiration for a graduate in Bhojpur
- **SSC** (CGL / CHSL / MTS)
- **Railway** (NTPC, Group D, ALP) — Ara sits on the main line; railway jobs are a family goal
- **Bihar Police / Daroga / BSSC**
- **Bihar Board** (Class 10 / 12) tuition, in volume
- JEE/NEET exists, but the serious aspirants often **leave for Patna or Kota**

This is the best possible news for us, and here is why: the exam we have the deepest, most credible bank for is **BPSC TRE — 2,026 real past-paper questions with real answer keys**. We built it in the last two weeks for a Patna institute. In Ara, that bank is not a nice-to-have; it is the main thing the town is studying for.

Your headline advantage over every competitor in Ara: *"TRE ke do hazaar se zyada ASLI past-paper questions — asli answer key ke saath. Chapter-wise. Aap jitne paper chahein nikaal sakte hain."*

Nobody else in Ara is handing an owner that.

2. The second wedge — "aapke students Patna bhaag rahe hain"

⚠ The structural anxiety of a small-city institute owner is that his best students leave for Patna, and he loses both the fee and the reputation. He usually cannot compete on faculty or building.

He can compete on rigour — weekly tests, real past-paper questions, a printed paper with his own name on it, and a report showing each student where they are weak. That is exactly what we give him, for ₹150–250 a month.

"Sir, Patna ke institute ka faayda kya hai? Test series. Aapke paas wahi test series aa jaaye — aapke naam se, asli TRE questions ke saath — to student yahin rukega."

Test that line early. If it lands with two owners, it becomes your standard opener.

3. The Play Store finding — and what it tells you

In Patna, our best lead source is a Play Store sweep: an institute with its own branded app has already paid ₹4–11 lakh for a white-label platform, so the owner is pre-qualified on budget and on willingness to buy software — and those platforms hand him a test module with **no questions in it**.

We ran the same sweep on Ara on 2026-08-18. It found almost nothing. Two real institutes with apps:

Institute	Platform	Signal
PANDEY CLASSES ARA	Classplus (reseller)	45 reviews, maths-heavy, reviews praise step-by-step solutions
Physics World Ara	self-built	52 reviews, Physics 11/12

Everything else the sweep returned was a false match on the letters "ara" (Aravali, Aarav, Aranyak, Aparajita, ARA Finserv — a finance company). Raw output: `ara_playstore_leads.csv`.

Two conclusions, both actionable:

1. **Ara is an on-foot market.** No scraper will build your list. Google Maps by locality, signboards, and your own network will. See `03_ARA_SOURCING_GUIDE.md`.
2. **The pitch changes.** In Patna we say *"your test module is empty."* In Ara, most owners have **no software at all** — so the conversation is not about replacing a tool, it is about the 3 hours a week they currently spend cutting and pasting questions from a guidebook. That is a simpler, more emotional sell. Lean into the time, not the technology.

And the two app-owning institutes above are your **highest-priority first visits** — they have already proved they will pay for software.

4. Where the institutes are — ⚠️ your knowledge beats this table

Deepak's outside read of the Ara coaching areas. **Verify every one of these on the ground and correct this file.** Pick ONE area per day so you walk between offices instead of crossing town.

⚠️ Likely cluster	What to expect
Station Road / Gopali Chowk	High footfall, competitive-exam centres, hoardings
Shiv Ganj / Nawada	Dense small tuition + coaching belt
Anaith Road / Pakri	Residential coaching, board tuition
Near Maharaja College / H. D. Jain College / V.K.S. University	Student-dense; graduate tutors running their own batches; govt-exam heavy
Ramna Maidan / Judges Court Road area	Established names, mixed

Fill this table properly in your first week. Replace ⚠️ rows with what you actually find: area name, roughly how many institutes, what they teach, and whether it is walkable. That corrected table is a genuine company asset — Patna's equivalent took Rohan a month.

5. Your ideal customer (ICP) — who to spend time on

Target: small to mid, **owner-run** institutes of roughly **20–300 students**, teaching a govt exam or board, where **the owner is in the building and decides the money on the spot**.

Why owner-run matters: he can say yes today. A branch manager cannot.

Skip: the big national chains (Aakash, Allen, PW, FIITJEE, Goal, Khan Sir-scale operations). No local buying authority, and a month of your life disappears into their process.

Also worth your time in Ara, unlike Patna: - **Solo star teachers** running their own batch of 40–100 from a rented room. In a govt-exam town these are everywhere, the whole decision is one person, and ₹250/month is nothing to them. - **Library / self-study centres** — Ara has these; they have students and no content. A test series is a straight upgrade to what they sell.

6. What to bring back in your first two weeks

Deepak needs three things from the region that he cannot get from Patna:

1. **A real list** — 40+ named Ara institutes with area, subject, size and phone in the CSV
2. **The corrected cluster map** — §4 above, rewritten from the ground
3. **The verbatim pain** — what Ara owners actually say when you ask who writes their test papers. Their words, not your summary. A pain heard 3+ times with a number attached becomes a feature.

The third one is the most valuable and the easiest to skip. Don't skip it.

05 · Pricing & the offer — the numbers you may quote

Never quote a number that is not on this page. If an owner asks for something else, the answer is "sir main confirm karke aaj shaam tak bata deta hoon" — then call Deepak. Making up a price in the room to save face costs the company far more than a two-hour delay.

Last updated: 2026-08-18. Check the date before every field day.

1. The price

	Per month	Who
Junior	₹150	Class 6–10 / foundation
Senior	₹250	Class 11–12, board, and all competitive exams — TRE, SSC, Railway, Banking, UPSC, JEE, NEET

Flat. Same number for a student, a solo teacher, or an institute. There is no per-student slab, no setup fee, no annual contract.

Free to start. Pay after month 1.

The pilot is free. Money is discussed after they have used it for a month. **This is our strongest close and you should use it every time** — it removes the entire risk from the owner's side and it is why "let me think about it" almost never survives it:

"Sir paisa abhi nahi. Aaj laga dete hain, ek mahina chalaiye. Students use karenge to baat karenge. Nahi karenge to band kar dijiye — kuch dena nahi hai."

White-label is FREE and self-serve

Their logo, their colour, their institute's name and watermark on every printed paper — set by them from their own dashboard at `/teacher/branding`. No charge, no waiting on us.

⚠️ **The ₹55,000 one-time white-label charge is DEAD. Never quote it.** It was replaced by the free self-serve feature. If you have quoted it to anyone, correct it immediately and tell Deepak.

2. The objection this pricing was designed to kill

You will get **"per student kitna?"** almost every time, because that is how Classplus and every other platform prices, and owners have been burned by it — their bill grows every time they succeed.

Answer: "Per student kuch nahi. Flat hai."

Then let the silence do the work. For an owner with 200 students who has been quoted per-head pricing before, this is the moment the conversation changes.

3. What is included at that price (all of it — there is no upsell tier)

- Unlimited test-paper generation — every exam, subject and chapter in the bank
- ~145,000 verified questions, including **2,026 real BPSC TRE past-paper questions**
- White-label branding on every paper
- Share-a-test links — students take the test with **no signup**
- Weak-topic dashboard after every test
- Printable papers
- WhatsApp AI tutor for their students
- The student practice app

There is no premium tier to hold back. Do not invent one.

4. Payment — the rules, no exceptions

- **Never collect cash. Ever.** Not "I'll deposit it tomorrow", not "the owner insisted".
- Payment goes **only** to the official TrigunAI payment link, which Deepak sends directly to the institute.
- You never handle the institute's money, and you never take a payment on the company's behalf.

If an owner wants to pay on the spot: that is the best problem in this job. Call Deepak immediately — same hour, even if it's evening. Do not let a ready buyer wait overnight.

5. Things you may NOT promise (without Deepak's written OK)

- Any discount below ₹150 / ₹250
- An annual or lifetime price
- An exclusive territory to an institute
- A feature we do not have live today (see `01_PRODUCT_MASTER.md` §4)
- A delivery date for anything not already built
- Any result, rank, or marks outcome

The correct response to all of these is identical: *"Sir main confirm karke bata deta hoon."* It costs you nothing and protects you completely.

6. If they want to resell it

Some owners — especially the ones who already run more than one branch — will ask whether they can sell Acharya to other institutes and earn from it.

Do not negotiate this in the room. Do not quote a partner rate. There is a partner programme, but its terms are currently being re-cut against the flat ₹150/₹250 pricing, and quoting the old numbers would be wrong.

Your line:

"Haan sir, iske liye humara partner program hai. Pehle aapke apne institute pe chalte hain, phir main Deepak sir se aapki baat karata hoon."

Then tell Deepak. An owner who wants to resell is a **serious** lead, not a distraction.

Owner: Deepak Kumar. This file is the single source of truth on price. If it conflicts with anything else — a PDF, an old message, something you remember — this file wins, and tell Deepak about the conflict.

04 • The demo — 3 minutes, in the room

The one principle: people believe what they DO, not what they watch. The entire demo is "hand them the phone." You talk less. The owner's own fingers, on his own exam, on a chapter **he** chose, is the sale. A polished video is the *weakest* demo — it is your parachute for no-signal, nothing more.

Before you walk in — the 30-second pre-check

Never let a demo die on friction. Every morning, before you leave:

- ☒ Open acharya.trigunai.com/exam-prep on your phone and **generate one paper yourself**. Today. Not yesterday. If it works, you walk in relaxed; if it's broken, you find out alone instead of in front of an owner.
- ☒ Phone charged. Mobile data on. Screen brightness up (you'll be handing it over in a bright room).
- ☒ You know which exam this owner teaches, and you have one chapter in your head ready to suggest if he freezes.
- ☒ You already did discovery — **you demo the pain he just named**, not a feature tour.
- ☒ The Hindi one-page leave-behind is in your bag.

THE 3-MINUTE FLOW — run it the same way every time

Step 1 • Recall their pain (10 seconds)

Tie the demo to what **he** just told you. Never start with "let me show you our product."

"Sir, aapne abhi bataya — har hafte paper banane mein teen-chaar ghante jaate hain. Ek minute, main dikhata hoon."

Step 2 • Hand him the phone — HE chooses (60 seconds)

This is the whole demo. **Do not tap it yourself.**

"Aap khud chuniye sir — kaunsa exam? TRE? SSC? Railway?" "Ab subject... aur chapter bhi aap hi chuniye. Polity? History?"

Let him pick. **The fact that he chose it is the entire proof** — a demo you drove is a video; a demo he drove is his product. Then stay quiet and let the paper appear.

Step 3 • The line that lands (20 seconds)

As the paper comes up on screen — this is the most important sentence in the whole job:

TrigunAI Innovations • Ara Field Kit • Priyanshu • Confidential • 2026-08-18

"Sir, ye AI ka banaya hua nahi hai. Ye ASLI TRE papers ke asli questions hain — asli answer key ke saath. Do hazaar se zyada. Aur aap jitne chahein paper nikaal sakte hain, kisi bhi chapter se."

Real past questions + unlimited papers. That is the pitch. Do not add features to it.

Step 4 • Show him HIS name on it (20 seconds)

The thing that makes it *his*:

"Aur ye paper aapke institute ke naam se chhapega — aapka logo, aapka naam. Bilkul free, aap khud set kar sakte hain."

For a small-town owner competing with Patna, **his name printed on a professional test paper is emotional, not functional.** Don't rush this part.

Step 5 • Don't end it — START it (30 seconds)

Never ask *"kaisa laga?"* That question invites *"sochkar batata hoon."* Assume the pilot:

"Chaliye, aaj hi aapke ek batch pe laga dete hain — aapke naam se. Free hai, paisa month ke baad. Aap khud dekh lijiye ki students use karte hain ya nahi."

Capture before you leave — all four, written down: 1. Batch size 2. Which exam 3. Start date 4. **The name of the person who will run it daily** ← the one everyone forgets, and the one that decides whether this becomes a real pilot or a nice memory

Demo variations — match the owner in front of you

Situation	What to do
Busy owner ("do minute hai")	Steps 2 + 3 only. He picks a chapter, paper appears, you say the "asli questions" line. 90 seconds.
Skeptic ("AI se padhai nahi hoti")	Agree with him. <i>"Bilkul sahi kaha sir — AI padha nahi sakta. Isliye hum padhane ki baat kar hi nahi rahe. Ye sirf paper banata hai — wo bhi asli purane papers se."</i> Reframing to a mechanical task defuses the whole objection.
"Mere paas already Classplus hai"	<i>"Bahut achha. Usme test banane ka option hai na? Usme questions kitne hain?"</i> — the answer is <i>none</i> , the owner supplies them himself. We fill his empty module; we don't replace his app.
No signal / it glitches	Do not fumble. Switch to the printed sample paper in your bag, then: <i>"main aapko link bhej deta hoon, aap khud try kijiye."</i> ⚠️ Carry a printed sample paper of the exam he teaches — in Ara this is more reliable than a video.
Owner won't touch the phone	You tap, but narrate it as HIS institute: <i>"maan lijiye aapke TRE batch ka test hai is Sunday..."</i> Still his exam, still his chapter.
He's a solo teacher, not an institute	Same demo, different close: <i>"Aapko institute banane ki zaroorat nahi — aapke naam se test series chal jayegi. ₹250 mahina."</i>

What NOT to do — these kill demos

- ❌ **Don't tap it yourself if he'll touch the phone.** His fingers = belief. Yours = a pitch.
- ❌ **Don't demo the wrong exam.** Always HIS exam. A JEE paper shown to a TRE institute means *"ye mere kaam ka nahi."*
- ❌ **Don't feature-tour.** Demo the ONE pain he named. Everything else is noise that dilutes it.
- ❌ **Don't demo anything that isn't live.** If he asks for something we don't have — attendance, fee collection, parent SMS — say *"abhi ye nahi hai"* and **log it**. Never mock up a fake screen.
- ❌ **Don't over-talk.** After you hand him the phone, **shut up**. Silence plus his own experience closes better than anything you can say.
- ❌ **Don't beg for a verdict.** Go straight to *"chaliye ek batch pe laga dete hain."*
- ❌ **Don't promise marks or results.** Ever. *"Zyada practice, aur progress dikhta hai."*

After the demo — the same evening

- Log the visit (*"log my visit to <institute>: ..."*)
- Send the WhatsApp follow-up **only if he said yes to receiving it**
- If a pilot was agreed: message Deepak the four captured items so the batch gets set up

- If the product misbehaved during the demo: **screenshot + which exam + which chapter → Deepak, same day**. Rohan's bug report on 17 August was fixed the same night. That responsiveness is a competitive advantage, but only if you actually report.
-

Created 2026-08-18 for the Ara field demo, adapted from the proven Patna playbook. The demo = hand him the phone, his exam, his chapter, his name on the paper, leave it running.

06 · The nine objections — have the answer ready

The principle behind every answer below: agree first, then reframe. Never argue with an institute owner in his own office. He is right about his world; he is just missing one fact about ours. Your job is to hand him that fact, not to win.

And the honest ones stay honest. If the true answer is "we don't have that", say it. You are building a region for years, not closing one paper today.

1. *"Per student kitna lagega?"*

"Per student kuch nahi, sir. Flat hai — ₹250 mahina, chahe 50 students hon ya 500."

Then stop talking. This is the single strongest thing in our pricing and it lands hardest in silence. Most owners have been quoted per-head pricing and know the bill grows every time they grow.

2. *"AI se padhai nahi hoti / AI pe bharosa nahi."*

Agree with him. Completely.

"Bilkul sahi kaha sir. AI padha nahi sakta — padhana aapka kaam hai, wo koi nahi le sakta. Isliye hum padhane ki baat kar hi nahi rahe. Ye sirf PAPER banata hai — wo bhi naya nahi likhta, purane ASLI papers ke asli questions se. Aapka teen ghanta bachta hai, bas."

This works because it is true, and because it shrinks the claim from something he distrusts (AI teaching) to something mechanical he can verify on the spot (real past questions, assembled fast).

3. *"Mere paas already Classplus / app hai."*

"Bahut achha sir. Usme test banane ka option bhi hai na? Usme kitne questions bhare hue hain?"

The answer is **none**. Classplus gives him an empty test module and he has to supply every question himself. He is often paying lakhs for the privilege.

"To hum uska replacement nahi hain — hum us khali test module ko bharte hain. Aapka app chalta rahe, paper humse aayega."

Never attack the platform he already bought. He chose it; attacking it makes him defend it.

4. "Students phone nahi laate / phone allow nahi hai."

"Bilkul, isliye paper PRINT hota hai — aapke naam se, aapke logo ke saath. Aap print kijiye, students paper pe test dein, jaise abhi dete hain. Phone ki zaroorat sirf aapko hai, paper nikalne ke liye."

⚠ In Ara this objection will be common and it is a **real** one, not a brush-off. The printable paper is the answer, and it is genuinely how most Ara institutes will use us. **Carry a printed sample paper** so this answer is something he can hold.

5. "Abhi time nahi hai / baad mein aana."

Do not accept a vague later. Shrink the ask:

"Sir do minute. Sirf ek cheez dikhata hoon — aap chapter chuniye, main paper nikaal ke dikhata hoon. Pasand na aaye to main nikal jaunga."

If he genuinely can't: **book a specific time** — "*kal subah 11 baje theek hai?*" — and write it down in front of him. "Baad mein" without a time is a no; take the no and log it.

6. "Kitna paisa? ... Mehenga hai."

Almost never a real objection at ₹250. What he is actually saying is "*I don't yet believe it's worth anything.*" So don't defend the price — remove it:

"Sir paisa abhi dena hi nahi hai. Ek mahina free chalaiye. Students use karenge to baat karenge, nahi karenge to band. Aapka kuch nahi jaata."

If he still pushes on price, do the arithmetic out loud:

"Ek paper banane mein aapke teen ghante jaate hain. Mahine mein bara ghante. ₹250 mein."

7. "Ye questions asli hain? Kahan se laaye?"

The best question anyone can ask you. Answer it straight:

"Asli past papers se, sir — TRE ke purane papers, unki official answer key ke saath. Do hazaar se zyada TRE questions. AI ne likhe nahi hain. Aap khud check kar lijiye — koi bhi question uthaiye aur apne guide se milaiye."

Then actually invite him to check one. An owner who verifies a question against his own guidebook and finds it correct is more than convinced — he becomes an advocate.

8. "Aap log kaun hain? Kitne institute use kar rahe hain?"

Do not inflate. Ever. He will check, and the town is small.

"Sir hum naye hain — TrigunAI, ek AI product company. Deepak sir khud product banate hain. Hum abhi apne pehle serious partners dhoondh rahe hain, aur isliye jo aap bologe wo seedha product mein jaayega. Bade company mein aapki baat sunne wala koi nahi hoga."

In a small town, "the founder answers the phone" beats "10,000 institutes trust us" — because he has been ignored by a big company before. **Make our smallness the offer.**

9. "Sochkar batata hoon."

This means the demo didn't land or he isn't the decision-maker. Diagnose, don't push:

"Bilkul sir. Bas ek baat — kya cheez hai jo abhi clear nahi hui?"

Whatever he says next is the **real** objection; everything before it was politeness. Answer that one. Then, instead of asking again:

"Ek kaam karte hain — aaj ek batch pe free laga dete hain. Aap sochte rahiye, students tab tak use karke dekh lenge."

And log what he said, verbatim. A logged no with a real reason is a win for the company. An unlogged maybe is nothing.

The meta-rule

If you don't know an answer: **"Sir main confirm karke aaj shaam tak bata deta hoon."**

Nobody has ever lost a deal by checking. People lose deals by guessing, being wrong, and being found out three weeks later when the institute is already using the product.

03 · Building the Ara list — where the institutes are

Companion to `ara_institutes.csv` (your working list) and `02_ARA_MARKET_BRIEF.md` (why Ara is different). **In Ara, the list is built on foot and on Maps — not by a scraper.** That is the whole point of hiring someone who lives there.

The one rule that shapes everything

Never cold-WhatsApp a number you scraped. Businesses publish phone numbers to receive **calls** — so you call, or you walk in. You get the WhatsApp opt-in **in the room or on the call**, from the owner's own mouth.

Bulk WhatsApp to scraped numbers gets our business number blocked, and that number also serves live students and Rohan's Patna work. One shortcut here damages everyone. No exceptions.

A. Google Maps — your primary desk source (do this tonight, before any visit)

This is 80% of your list and costs you two evenings.

Search per locality, in Hindi and English, and work each result:

coaching Ara Bihar	BPSC coaching Ara	SSC coaching Ara
railway coaching Ara	daroga coaching Ara	BSSC coaching Ara
tuition Ara Bhojpur	class 10 tuition Ara	class 12 coaching Ara
कोचिंग आरा	competitive exam coaching Arrah	
coaching Gopali Chowk	coaching Station Road Ara	coaching Shiv Ganj Ara

⚠️ **Search "Arrah" as well as "Ara"** — Maps listings use both spellings, and you will miss half the town if you only use one.

For each listing capture into the CSV: **name · area · phone · what they teach · review count**.

Review count is your size proxy. More reviews ≈ more students. But **pick the small and mid ones** — a 500-review chain has no local decision-maker; a 15-review owner-run centre will decide in front of you.

Read the reviews themselves. Complaints about study material, papers, or tests are pure gold — that is a public, timestamped, named pain you can open the conversation with.

B. On foot — the part only you can do

In a town like Ara **the signboards are the directory**. Walk one cluster per evening with your phone:

- Photograph every coaching signboard: name + phone + what it teaches

- Note whether the shutter is up and students are actually going in — a board on a wall is not an institute
- Coaching centres cluster around **colleges, the station, and the main chowks** — walk those first
- Add each to the CSV that same night. A photo you never transcribe is not a lead.

Look for the small ones above shops and in lanes. Those are owner-run, decide instantly, and are invisible to every competitor selling into Ara from a Patna office.

C. Your own network — your genuine edge

You live there. This is the thing Rohan cannot do in Patna and no scraper can do anywhere.

- Teachers you already know; teachers your family knows
- Your own former coaching centre, your school, your college
- Photocopy / printing shops near the colleges — **they print everyone's test papers**. The owner of a printing shop knows exactly which institute runs tests, how often, and how thick the papers are. ⚠️ Untested idea, but if it works it is the single best-informed source in town — try one, and tell Deepak what happened.
- Book shops selling guidebooks — they know who buys question banks in bulk

A warm introduction converts several times better than a cold knock. Spend your first week's evenings on this, not on the internet.

D. The two institutes we already found (start here)

From the 2026-08-18 Play Store sweep — these two have **already paid for software**, which makes them pre-qualified on budget and on willingness to buy. Get their number from Google Maps or their own site (the app listing gives only the vendor's contact, never theirs).

Institute	Signal	Why they matter
PANDEY CLASSES ARA	Classplus app, 45 reviews, maths-heavy; reviews praise step-by-step solutions	Already pays for a platform whose test module ships empty . That is our exact pitch.
Physics World Ara	Self-built app, 52 reviews, Physics 11/12	Built their own app → unusually tech-forward owner for Ara.

Raw sweep output with the verbatim review quotes: `ara_playstore_leads.csv`.

E. Other directories — worth one evening, not more

- **Justdial / Sulekha**, filtered to Ara / Arrah — coaching categories, numbers visible
- **Facebook** — "Ara coaching", "Arrah tuition", local coaching-owner groups. ⚠️ Facebook is genuinely strong in small-town Bihar; worth a proper look

- **YouTube** — many small-town teachers run local channels. A teacher with 5k local subscribers has a real batch and a real ego about his content. Good lead, good conversation.
-

F. Do NOT waste time on

- Big national chains — no local buying authority
 - Paid-lead sites (UrbanPro / TeacherOn) — gated, low quality, and their student leads are often fake
 - Bulk WhatsApp to scraped numbers — see the rule at the top
 - **The Play Store sweep for Ara.** It works for Patna; it does not work here. We already ran it and it returned mostly false matches on the letters "ara". Don't re-run it hoping for more.
-

G. How a name moves through the pipeline

add to CSV → call ahead (or just walk in) → VISIT → discovery → demo
→ free pilot agreed → pilot LIVE on a batch → students take a test → FIRST PAID

Update `precall` / `visit_status` / `pilot_status` / `pain_notes` as it moves. **Same day.**

The `pain_notes` column is the most valuable column in the file. Verbatim quotes, not summaries. "*Har Sunday raat 11 baje tak paper banata hoon*" is worth more than "*finds paper-making hard*" — the first one tells Deepak what to build and gives you a line to use on the next owner.

Created 2026-08-18 for the Ara push. Update this file as you learn which clusters convert — it is yours to correct, and the corrected version is what your team will be trained on.

09 · Your first 15 days

One goal for the whole fortnight: **one Ara institute with a live batch whose students actually took a test**. Everything below serves that. Not five signed pilots, not a big list — **one real installation**, because the first one teaches you the motion and gives you a name to drop with every institute after it.

Days 1–2 · Learn the product properly (at home)

- [] Read the kit in the order given in `SKILL.md` §1 (~90 min)
- [] **Generate five test papers yourself** on `acharya.trigunai.com/exam-prep` — TRE, SSC, Railway, Class 10, Class 12. Different chapters each time.
- [] **Print one**. Hold it. That printed sheet is what you are actually selling in Ara, and you should know what it looks and feels like before an owner does.
- [] Try to break it — pick an obscure chapter, an odd combination. **Whatever breaks, tell Deepak**. Finding a bug in week 1 is a contribution, not a complaint.
- [] Run the demo on a friend or family member, out loud, twice. It should take 3 minutes.

Do not visit an institute in these two days. A weak first demo in a small town is expensive — word travels, and you only get one first impression per owner.

Days 3–4 · Build the list

- [] Google Maps sweep — every search string in `03_ARA_SOURCING_GUIDE.md` §A, both spellings (Ara **and** Arrah)
- [] **Target: 40+ names in `ara_institutes.csv`** with name, area, phone, subject
- [] Walk two clusters in the evening; photograph signboards; transcribe the same night
- [] Call/message three people in your own network for warm introductions
- [] Correct the cluster table in `02_ARA_MARKET_BRIEF.md` §4 with what you actually saw

The list is the region. This is unglamorous and it is the highest-leverage work of the fortnight.

Days 5–8 · First visits (target: 12 real conversations)

- [] **Start with the two app-owning institutes** — PANDEY CLASSES ARA and Physics World Ara. They already pay for software. (`03_ARA_SOURCING_GUIDE.md` §D)
- [] ONE cluster per day — 3–4 institutes you can walk between
- [] Discovery first, every time. Ten minutes of them talking before you show anything.
- [] Log every single one the same day, including the nos, with their exact reason
- [] Aim for **3 real conversations a day**. Depth over count.

By day 8 you should be able to answer, from your own field notes: who writes test papers in Ara, how long it takes them, and what they currently use. If you can't, you have been pitching instead of listening — go back to `07_FIELD_RESEARCH_GUIDE.md`.

Days 9–12 · Convert one pilot into a live batch

- [] Go back to the two or three warmest from days 5–8. **The second visit closes more than the first** — small-town trust is built on returning.
 - [] Get one batch live: batch size · exam · start date · **the name of the person who runs it daily**
 - [] Sit with that person once and watch them generate a paper themselves. Do not do it for them. An institute where only *you* can operate it will churn the day you stop visiting.
 - [] Make sure a test actually happens that week. Chase it. This is the whole fortnight.
-

Days 13–15 · Prove it and report

- [] Confirm students took a test — how many, which exam, what the dashboard showed
 - [] Get a photo of the printed paper with the institute's name on it (**ask permission**) — this is your single best selling asset for every subsequent visit in Ara
 - [] Ask the owner the referral question: *"aapke jaan-pehchaan mein aur kaun bada batch chalata hai?"*
 - [] Send Deepak the fortnight report (§below)
 - [] **Only now**, open `08_TEAM_BUILD_PLAYBOOK.md`
-

Your fortnight report to Deepak — five lines, nothing more

1. Institutes in the list: _____
2. Real conversations: _____
3. Demos given: _____
4. Batches LIVE (students took a test this week): ____
5. The three most common things owners said about test papers (their words):
6. HINDI: of the owners you asked — how many said English-only would BLOCK them? ____ / ____

Line 6 is a live product decision waiting on you. The papers are English-only today. Building Hindi is about a week of work, and Deepak will only spend it if Ara owners say English-only stops them using it. Ask both halves of the question (`SKILL.md` §3) and report the count, not your impression.

Line 4 is the only one that counts. Lines 1–3 explain line 4; they do not substitute for it.

What "good" looks like at day 15

Good: 40+ institutes listed, ~12 conversations, **1 batch live with a real test taken**, and you can quote three owners verbatim on their test-paper pain.

Not good, even though it feels good: 60 institutes listed, 25 visits, eight owners who "loved it", zero batches live. That is the exact shape of a wasted fortnight, and it is the most common way this job goes wrong — because every day of it feels productive.

Also good, and worth saying: one batch live and *nine clear nos with real reasons*. The nos are data the company does not currently have, and they are why we hired someone who lives there.

10 · The rules, and when to call Deepak

Short file. Read it once, properly. Everything here has cost somebody something.

1. The honesty rules — never break these

These are not style guidance. Breaking them damages the company in a town where everyone knows everyone, and they are grounds for ending the appointment.

- **Never promise marks, ranks or results.** Say "*zyada practice, aur progress dikhta hai.*"
- **Never say thousands of institutes use us.** We are newly launched and looking for our first serious partners. Say that. It works better anyway (`06_OBJECTIONS.md` §8).
- **Never demo or describe a feature that isn't live.** If they ask for something we don't have, say "*abhi ye nahi hai*" and log it. **Never mock up a fake screen.**
- **Never hide a flaw the owner can see himself.** The mixed-bucket GS questions, the fact that we don't do fee collection — say them before he finds them.
- **Never collect cash.** Payments go only to the official TrigunAI link, sent by Deepak.
- **Never quote a price that isn't in** `05_PRICING_AND_OFFER.md`.

The test: could the owner check this on his own phone in 60 seconds and find you wrong? Then don't say it.

2. The conduct rules

- **Never cold-WhatsApp a scraped number.** Call, or walk in. Opt-in comes from his own mouth. Our business number also serves live students and Rohan's Patna work — one block hurts everyone.
 - **Never share the lead list, the CSV, or your login/key with anyone** — including a hire. Every person gets their own from Deepak, so it can be revoked when they leave.
 - **Never touch our servers or the live system.** Real students are on it right now. If something looks broken, report it — do not try to fix it.
 - **Never commit to a territory, an exclusivity, or a timeline** on the company's behalf.
-

3. Log everything, same day

No log = it did not happen. This is how you get credit, how your team gets paid, and how Deepak sees the region without calling you every evening.

Log the nos with their exact reason. A no with a reason is more valuable to the company than a maybe, and you will never remember it accurately tomorrow.

4. Call Deepak the same day when

Situation	Why it can't wait
An owner wants to pay now	This is the whole point of the company. Do not let a ready buyer sit overnight.
Anything broke during a demo	Send: screenshot + which exam + which chapter. Rohan's 17 Aug bug report was fixed the same night.
A price or term request outside the sheet	Guessing costs more than a two-hour delay.
An owner asks about reselling	Serious lead, and the partner terms are being re-cut.
You want to hire someone	He mints their kit and access.
Something feels wrong — a lead who wants money up front, a demand for our data, anything odd	Trust the instinct. Ask.

Weekly, not daily: your number — institutes listed, conversations, demos, **batches live.**

Never wait to report a failure. A pilot that died in week 2 is useful information in week 2 and useless in week 6. Nobody here is upset by a no; people are upset by a surprise.

5. What Deepak owns, so you never have to guess

- Product, and anything about what it will do next
 - All pricing and all compensation
 - Any commitment made to a customer
 - Access, keys, and kits for every person in the region
-

6. What you own

- The Ara list, the routes, the daily work
- Who you hire, train and let go (with his sign-off on their pay)
- The region's number
- **Correcting this kit.** Everything in it was written from outside Ara. When the ground disagrees with the document, **the document is wrong.** Say so, and it gets changed.

11 · Your terms — Priyanshu

Effective 2026-08-18. Same structure as the Patna field role, so the two regions stay consistent and comparable. Any change comes from Deepak in writing — not from a conversation.

1. Your compensation

Component	Amount	Condition
Fixed	₹10,000 / month	—
Per visit	₹200	Per verified, logged visit. Capped at 25 visits/month (max ₹5,000).
Per converted visit	₹500	The institute agrees to a pilot and a batch goes live
Per first payment	₹1,100	The institute's first payment actually reaches TrigunAI

So a normal working month is ₹10,000–15,000 before conversions, and the upside sits entirely on the two things that matter: **batches that go live**, and **money that arrives**.

2. The two rules behind those numbers

A · Paid against verified logs only. No log = no visit = no payment. Not a technicality — it is the only way Deepak can see the region without standing in it. Log the same day, every day, including the nos.

A "verified" visit means the row exists in `ara_institutes.csv` with: institute, area, date, who you met, what they said about test papers, and the next step. Attach a proof point when you can — a photo of the office, the owner's card.

B · The bonus sits on installations, not interest. ₹500 is for a batch that went live. Not for an owner who liked it, not for a promised start date. This is deliberate: you get paid for what the company actually needs, and it protects you from spending a month on people who were only being polite.

3. No cash — ever

You never collect money from an institute. Payments go **only** to the official TrigunAI link, which Deepak sends directly to them. This protects you as much as it protects the company.

4. What you may pay a field hire

Same structure, same numbers — ₹10,000 fixed + ₹200/verified visit (cap 25/mo) + ₹500/converted visit + ₹1,100/first payment.

Confirm each hire's package with Deepak before you offer it. You choose who to hire; he approves the money. Never agree pay with someone before you have his yes in writing — reversing it afterwards costs you their trust permanently.

And hold the same two rules with them that Deepak holds with you: **verified logs only**, and **the bonus on batches live, not on interest**. The first exception you make to the logging rule destroys the whole system, so make none.

5. When your own terms get revisited

At the **day-15 checkpoint**, and again once Ara has a team. If the structure isn't working — for you or for the region — say so then, plainly, with the numbers. That conversation is expected, not a complaint.

Issued by Deepak Kumar, Co-Founder & CEO, TrigunAI Innovations · 2026-08-18. Mirrors the Patna field role terms so both regions stay comparable.

o8 · Building your Ara team

Do not open this in week 1. The trigger to start hiring is **one pilot live in Ara with students actually taking tests** — not a promising conversation, not a verbal yes.

Why the gate matters: you cannot train someone into a motion you have not run yourself. If you hire before you have closed one, you will teach them your guesses, they will fail, and you will lose a month plus the money. Rohan ran Patna alone for weeks before anything scaled. That order is deliberate.

1. What you are actually hiring for

Not "a salesman." You are hiring **feet and a notebook**: someone who can walk into a coaching centre, get an owner talking for ten minutes, run a three-minute demo off a phone, and write down what happened the same day.

Hire for these four, in this order:

- 1. **Shows up.** Reliability beats charm by a mile in this job. Most field hires fail on attendance, not on skill.
- 2. **Can make a stranger talk.** Test it in the interview — see §3.
- 3. **Writes things down.** If they can't log, they don't exist to the company.
- 4. **Local.** Knows the lanes, the colleges, the coaching belts, and ideally a few owners.

Do not hire for: English, degrees, a "sales background", or a good-looking CV. None of them predict anything here.

2. Who to look for in Ara

Profile	Why it works	Watch out for
Recent graduate, V.K.S. University / Maharaja College	Knows every coaching centre in town because he studied at one; hungry; cheap to start	May be preparing for an exam himself — will vanish before the exam. Ask directly.
A tutor who teaches part-time	Owners respect him, he speaks their language, he already knows the pain	Conflict of interest if he runs his own batch — check
Someone who has done field sales (SIM cards, insurance, medical rep)	Already knows how to walk into a shop and not freeze	May be a talker who never logs. Test the writing.

Start with ONE. Two is not twice the output at the beginning; it is twice the confusion. Add the second only when the first is producing without you standing next to him.

3. The interview — 30 minutes, three tests

Skip the CV conversation entirely. Run these:

Test 1 — Can he make a stranger talk? (10 min) Take him to an actual coaching centre. Tell him: *"Go in and find out how they make their test papers. Don't sell anything."* Wait outside. → **Pass:** he comes out with facts — who writes the papers, how long it takes, how often they test. → **Fail:** he comes out with "they said they're busy" or with a pitch he wasn't asked to give.

Test 2 — Can he write it down? (5 min) *"Ab jo suna, wo likh ke do."* → **Pass:** specific, in the owner's own words. → **Fail:** vague, generalised, or three lines of nothing. This one is not trainable in a hurry.

Test 3 — Will he be here in three months? (5 min) Ask straight: *"Aap kaunsa exam prepare kar rahe ho?"* Everyone in Ara is preparing for something. That is fine — but you need to know the exam date, because you will lose him around it. A hire who tells you honestly is a good sign. One who says "koi nahi" is often lying.

4. How to pay a field hire

The numbers are set — same as Patna, and same as your own (full detail in `11_YOUR_TERMS.md`):

Component	Amount
Fixed	₹10,000 / month
Per verified, logged visit	₹200 (cap 25/month)
Per converted visit — a batch goes live	₹500
Per first payment received by TrigunAI	₹1,100

⚠ **Confirm each hire's package with Deepak before you offer it.** You pick the person; he approves the money. Never agree pay before you have his yes in writing — walking it back later costs you that person's trust for good.

The two rules that must hold: 1. **Paid against verified logs only.** No log = no visit = no payment. Say this on day one, plainly, and never make an exception — the first exception destroys the whole system. 2. **The bonus sits on the real outcome** — a batch live and students taking tests — **not** on "owner was interested." Pay for what you actually want, or you will get a lot of interest and no installations.

5. How to run the week (keep it this light)

When	What	How long
Monday morning	Assign each person ONE area for the week + their target list from the CSV	20 min
Every evening	They log. You read the logs. You do not need to call.	10 min
Wednesday	Ride along with one of them on a real visit. Watch, don't rescue.	2 hrs
Saturday	The week's number: visits, demos, pilots live, tests actually taken	30 min

The Wednesday ride-along is the whole training system. You will learn more about why someone is failing in one real visit than in ten phone calls, and you cannot fix a demo you have never watched.

Rule: watch, don't rescue. Let them run the bad demo to the end. Debrief in the auto afterwards. If you take over in the room, they learn nothing and lose the owner's respect permanently.

6. What you own vs what Deepak owns

You (Ara)	Deepak
Who gets hired and fired	All compensation numbers
The list, the routes, the daily work	Product, pricing, and any commitment to a customer
Training and the weekly rhythm	Minting each hire's kit + SSH access (<code>transfer-caller-role</code>)
The region's number	Whether the region gets more people

When you want to add a person: tell Deepak the name, what they'll do, and what you propose to pay them. He mints their kit and their access. **Never share your own key or login with a hire** — every person gets their own, so it can be revoked cleanly when they leave.

7. The failure mode to watch for

A team that produces **activity** instead of **installations**: lots of visits logged, lots of "interested" owners, zero batches live.

The fix is not more visits. It is to look at what the team is being praised and paid for. If you celebrate visit counts, you will get visit counts. **Celebrate — out loud, in the group — only two things: a batch that went live, and a good honest NO with its real reason.**

That is the same trap Deepak fell into on the product side for a year, at much greater cost. Read

`01_PRODUCT_MASTER.md` §7 and don't repeat it in the field.
