

Why Acharya

The authentic exam-paper & assessment engine — for institutes, teachers & students

TrigunAI

Agentic AI for education

Anyone can build an app that makes questions. The hard part is different.

The hard part is questions that are **real**, with **correct answers**, in the **exact exam pattern**, that **never run out**, and that **track each student's weak spots**. That is what we spent months building — and it is why a generic tool cannot match it.

1.45 lakh+

REAL, VERIFIED QUESTIONS

6+ exams

JEE · NEET · BOARDS · UPSC · BANKING

EN / हिंदी

BILINGUAL, BUILT-IN

What makes it genuinely better

Real questions, not AI guesses

Over 1.45 lakh actual past-paper & exemplar questions with official answer keys — cleaned and de-duplicated. A generic tool starts with zero real questions.

Authentic exam pattern

Tagged by chapter, concept & difficulty, and generated in the real exam's pattern — not random MCQs.

Tracks each student

Not just a paper — Acharya shows which student is weak in which chapter, with revision. That is the real value.

Instant, whole class at once

Questions served instantly from a ready pool — your entire batch can practise together, fast.

Every answer is verified

We solve and cross-check each answer against the official key. Generic AI gets nearly half of hard JEE answers wrong — and wrong answers break student trust.

Unlimited & copyright-clean

Fresh questions grounded in real ones, with a check that blocks copies. You never run out — and nothing is scraped or copied from other coaching material.

Diagrams done right

Never serves a broken "as shown in the figure" question with no figure — a safeguard blocks it. Cheap tools don't.

Live & improving daily

Already running, refills automatically every night, and keeps growing as more institutes use it.

Thinking of building your own, or using ChatGPT? Please try it — ask for 10 JEE/NEET questions with answers, then check the answers. You'll find wrong answers and repeats. That's exactly the problem we solved. Making questions is easy; the **verified answer bank is the real work** — 1.45 lakh questions and months of building. You teach; let Acharya handle the testing.

Honest note: we don't promise marks or guaranteed results — we give authentic practice and honest tracking. Freshly-generated questions are for practice; graded papers use verified official keys.
