

Acharya - Manual Testing Guide

Test BOTH products end to end: the **Teacher / Institute app (B2B)** and the **Student app (B2C)**. Tick each row. Anything that does not match the 'WHAT YOU SHOULD SEE' column is a bug - write it down.

Tester	Rohan
Date	___ / ___ / 2026
Build	lms:v99 (live)
Teacher app (B2B)	acharya.trigunai.com/teacher
Student app (B2C)	acharya.trigunai.com/exam-prep
Field launcher	gurukul.trigunai.com/demo

BEFORE YOU START - what you need

- 1) **Two devices** (your phone = teacher, a second phone or laptop = student). You can also use one phone + an incognito/private window.
- 2) Internet on both.
- 3) A **fresh email** you have not used before (for a clean signup test).
- 4) About **30-40 minutes**.
- 5) Keep a pen - tick the OK column, and write the step number of anything broken.

READY-MADE DEMO TESTS (already created, use if you want to skip generating)

- Log in to the teacher app with email **rohan.demo@trigunai.com** (no password) and you will already have 2 real tests:
- NEET Biology - Biological Classification - student link: **acharya.trigunai.com/t/E5XRKH**
 - JEE Physics - Laws of Motion - student link: **acharya.trigunai.com/t/5GEGFX**

PART A - TEACHER / INSTITUTE APP (B2B)

This is what you sell to a coaching institute. The promise: **teacher makes a real test in seconds, shares one link, and sees exactly who is weak in which topic.**

#	DO THIS	WHAT YOU SHOULD SEE (= PASS)	OK?
1	Open acharya.trigunai.com/teacher on your phone.	A page: ' You teach. Acharya tests & tracks. ' with a Continue with Google button, and a form: Your name / Institute name / Email.	[]
2	Fill Name + Institute name + a fresh email . Tap Set up my class .	You land on the teacher home: ' Namaste, <your name> '. Your institute name shows at the top under 'Acharya'. No password was asked.	[]
3	(Optional) Log out, come back, and try Continue with Google instead.	Google sign-in opens and logs you straight in to the same teacher home.	[]
4	Tap Create a test .	Step 1 shows 6 subjects : JEE Physics, JEE Chemistry, JEE Mathematics, NEET Biology, NEET Physics, NEET Chemistry.	[]
5	Tap NEET Biology .	Chapter list loads underneath (many chapters). Difficulty pills appear (Easy / Mix / Hard, Mix pre-selected) and question count (5 / 8 / 10).	[]
6	Tap 1 or 2 chapters.	The chapters highlight. The bottom Generate test button turns from grey to orange (enabled).	[]
7	Tap Generate test and WAIT.	A spinner: 'Writing your test...'. It can take 15 seconds to 2 minutes - this is normal, it is writing brand-new questions. Then the test page opens.	[]

#	DO THIS	WHAT YOU SHOULD SEE (= PASS)	OK?
8	On the test page, check the share box . Tap Copy .	A link like acharya.trigunai.com/t/ABC123 . 'Copy' confirms with a green tick. Also see: Share on WhatsApp, Print paper, and 3 boxes (students took it / class average / test code).	[]
9	Tap Print paper .	A clean printable paper: your institute name on top, Name/Date/Marks line, and the questions. Maths must look like real maths (proper fractions, symbols, diagrams) - NOT raw code like $\frac{a}{b}$.	[]
10	On the print page tap Show answer key + solutions .	An Answer key (Q1: B, Q2: D ...) plus a Solutions section with a written explanation for each question. 'Print / Save PDF' opens the print dialog.	[]
11	Now take the student link to the SECOND device and open it.	A simple page: test name, subject, and 'Your name' box. No signup, no login, no app is asked for.	[]
12	Type a student name (e.g. 'Test Student 1') and tap Start the test .	The test opens instantly (no waiting). Questions show proper maths and diagrams. There is an EN / Hindi toggle at top right.	[]
13	Answer every question - deliberately get some wrong . Finish the test.	After each answer you see if it was right/wrong plus an explanation. At the end: a score %, the weak topics, and the line 'Submitted - your teacher can now see your result.'	[]
14	Go back to the TEACHER phone. Reload the test page.	The student now appears by name with a score % and 'weak in: <topic>' . The 'Where the class is weak' row shows the topic with a count.	[]
15	Tap Class dashboard (top menu).	'Your class at a glance' : 'Topics to teach next' + every student listed weakest first . A student under 40% gets a red NEEDS HELP flag.	[]
16	Repeat steps 11-13 on the second device with a different name (e.g. 'Test Student 2'), answering MOSTLY CORRECTLY.	Dashboard now shows both students; the weak one is on top, the strong one below with a higher %. Percentages and colours differ (red / amber / green).	[]
17	Tap Log out , then log in again with the same email .	Your tests are all still there with their results. Nothing lost.	[]

PART B - STUDENT APP (B2C)

This is the self-serve product a student finds on their own: free 14 days, then Rs.199/month.

#	DO THIS	WHAT YOU SHOULD SEE (= PASS)	OK?
1	Open acharya.trigunai.com/exam-prep (use a fresh browser / incognito).	'Find your weak topics before the exam does.' Then a card 'Start free in 10 seconds' with an exam grid.	[]
2	Look at the exam grid carefully.	11 exams . Only JEE / IIT and NEET carry a green LIVE tag. The other 9 (Class 10, Class 12, CUET, UPSC, SSC, Banking, GATE, CAT, CLAT) are faded with a SOON tag.	[]
3	Try tapping a SOON exam (e.g. UPSC).	Nothing happens - it cannot be selected. Only JEE and NEET can be picked. (This is correct behaviour.)	[]
4	Check above the email box.	A Sign in with Google button is visible. A Google one-tap popup may also appear automatically. Below the form: 'Prefer WhatsApp?' and 'Already registered? Log in' .	[]
5	Tap NEET , enter a fresh email, tap Start my free 14-day trial .	You go to a page: 'What are you preparing for?' with NEET already selected.	[]
6	On that page check the goal options and subjects, then tap Start preparing .	3 goals (IIT-JEE Advanced / JEE Main / NEET). Under NEET, subjects Biology, Physics, Chemistry are ticked. Tapping a different goal swaps the subjects.	[]

#	DO THIS	WHAT YOU SHOULD SEE (= PASS)	OK?
7	You land on the student home (Today).	'Goal: NEET' chip with a small change link, 14 free days left , a 0% mastery ring, Start Smart Practice , and your topics: NEET Biology / Physics / Chemistry.	[]
8	Tap NEET Biology .	Chapter list with sub-topics you can tick, plus difficulty pills and a question count, and a 'Start test' button at the bottom.	[]
9	Pick 1-2 sub-topics and start the test. WAIT for it to prepare.	'Acharya is writing fresh questions...' then the test starts. Questions show proper maths and diagrams - not raw code.	[]
10	Answer a question wrong on purpose .	A coloured box appears with the correct answer and a readable explanation . Maths inside the explanation also renders properly.	[]
11	Tap the Hindi toggle at the top.	The question text switches to Hindi. Toggling back returns to English.	[]
12	Finish the whole test.	A scorecard: score %, which topics are solid / shaky / weak, and a suggestion of what to practise next. Option to review your answers.	[]
13	Go back to the home (Today) screen.	The mastery ring is no longer 0% , test count went up, and Focus areas now lists the topic you were weak in.	[]
14	Open Report from the top menu.	Your strengths and weak spots, a recommended difficulty, 'practise next' suggestions, and your saved past test (you can reopen it).	[]
15	Open Mock tests from the top menu.	A list of full mock papers you can sit (exam mode with a timer).	[]
16	Go back to Today and tap change next to 'Goal: NEET'. Switch to IIT-JEE (Advanced) and save.	The goal chip now reads Goal: IIT-JEE (Advanced) and your topics change to the JEE subjects. Your old results are not deleted.	[]
17	Log out. Then use Already registered? Log in with the same email (or Google).	You get back into the same account with your progress intact.	[]

PART C - KNOWN BEHAVIOUR (do NOT report these as bugs)

These are expected today

Report anything else, but not these.

- **Test generation takes 15 seconds to 2 minutes.** It is writing brand-new questions each time (that is the point - papers never repeat). It is not frozen.
- **The student class-test shows the answer after each question.** It is a diagnostic test to find weak topics, not a sealed exam. A no-feedback exam mode is a later build.
- **The class dashboard groups students by the NAME they type.** If two students type the same name, they merge into one row. A proper student roster is the next build.
- **The 9 'SOON' exams have no questions yet.** Only JEE and NEET are ready - by design.
- **Google sign-in only works on acharya.trigunai.com** (not on a local/test address). The one-tap popup may not appear if you dismissed it earlier or are not signed in to Google.
- **Mock test papers are Physics-only right now** and may have 15-16 questions instead of 17.
- **The teacher app is free to use right now** - there is no payment screen on the teacher side yet. Pricing is handled by you in person.

PART D - HOW TO REPORT A PROBLEM

For **every** failure, send Deepak these 6 things. A screenshot alone is not enough - the step number is what makes it fixable.

#	SEND THIS	EXAMPLE
1	Which part + step number	e.g. 'Part A, step 9'
2	The exact web address you were on	e.g. acharya.trigunai.com/teacher/new
3	What you EXPECTED to see	copy it from the checklist
4	What ACTUALLY happened	in one line
5	A screenshot (or short screen recording)	most important for display problems
6	Which phone + which browser	e.g. Android, Chrome

THE 3 THINGS THAT MATTER MOST

If you only have 10 minutes, test these - they are the whole sales pitch:

1. A teacher can create a real test and it actually generates (Part A, 4-7).
2. A student can take it from a link with **no signup** (Part A, 11-13).
3. The teacher dashboard shows **who is weak in which topic** (Part A, 14-15).

RESULT SUMMARY - fill this in and send back

SECTION	STEPS	PASSED	FAILED	FAILED STEP NUMBERS
Part A - Teacher (B2B)	17	_____	_____	_____
Part B - Student (B2C)	17	_____	_____	_____

Would you show this to an institute owner tomorrow? YES ☐ NO ☐ If NO, why:
